Milk both causes and prevents cancer

● One study

Source: Schoenfeld and Ioannidis, American Journal of Clinical Nutrition

A microscopic view of several bacteria, likely E. coli, with long, thin, yellow flagella extending from their red, spherical bodies. The background is dark with some blue and purple bokeh lights.

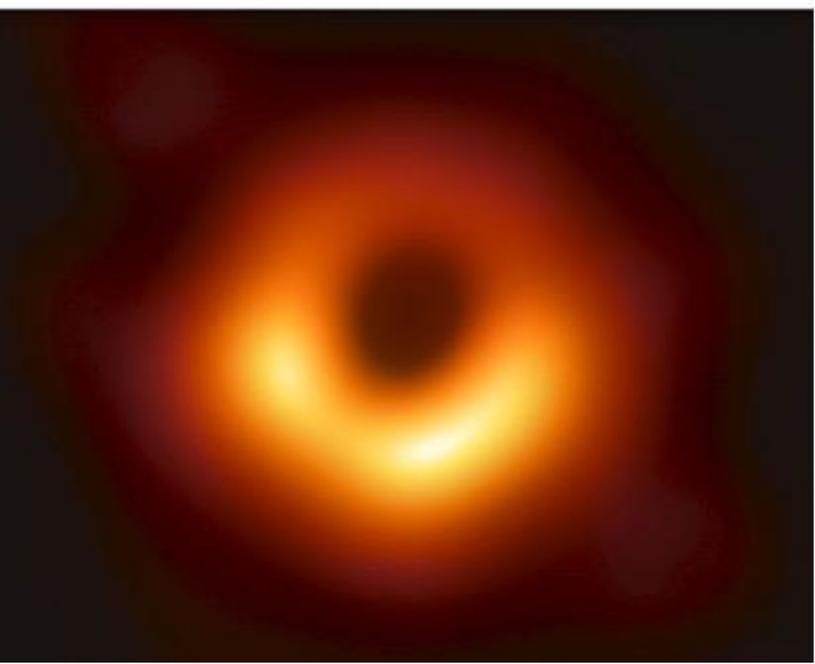

“Fact checking and peer review are more important than ever because of the reality that false information now flows freely. That can be extremely harmful, particularly in public health campaigns.”

*Professor Tawana Kupe
Vice Chancellor, University of Pretoria*

Paul Richards

Director of Communications and Outreach

TRUST

A dramatic photograph of a space shuttle launching, with a massive plume of white and yellow smoke and fire trailing behind it against a dark sky. The word "TRUST" is written in large, white, sans-serif capital letters across the top of the image.

THE PROCESS

1

Content commissioned, based on priority messaging or topical themes

2

Content researched by science communicators

3

Content produced by media professionals, including interviews with fellows

4

Content sent to a fellow of the scientific discipline for approval

'Inspirational role model': Incoming Chief Scientist overcame dyslexia to reach the top

Prime Minister Scott Morrison announced Australia's next Chief Scientist would be Dr Cathy Foley. Vision: Australian Academy of Science.

Kathleen Folbigg conviction questioned after scientists discover genetic mutation which 'likely' killed two children
